

GOBOLT MEDIA KIT

About GoBolt: Boilerplate

Founded in 2017, GoBolt is building the largest sustainable supply chain network. GoBolt provides reliable warehousing, pick and pack, shipping, and last-mile delivery solutions.

With a growing network of warehouses across North America and a suite of proprietary apps designed and supported by an in-house engineering team, GoBolt unlocks enhanced transparency and control for merchants. GoBolt is proud to offer carbon-neutral deliveries by prioritizing delivery in an electric vehicle and sequestering equivalent carbon emissions when that is not possible. For more information, visit GoBolt.com.

The GoBolt Story

GoBolt's story is rooted in the desire to simplify logistics. When co-founders [Mark Ang](#) and [Heindrik Bernabe](#) launched Second Closet (a B2C storage service), they quickly encountered the challenges of relying on third-party logistics providers to handle deliveries. Instead of accepting these inefficiencies, they took matters into their own hands, developing custom logistics software to streamline operations and ensure control over the entire process.

As GoBolt evolved from a B2C service to a B2B logistics company, the focus on simplifying logistics remained at the core. We leverage our in-house technology and infrastructure to create integrated solutions that reduce the complexity of managing fulfillment and deliveries for mid-market and enterprise businesses.

Today, with operations across Canada and the U.S., GoBolt continues to simplify logistics on a larger scale. Our sustainable, tech-enabled logistics solutions reduce carbon emissions, offering companies an easy way to manage their logistics while staying aligned with environmental goals.

GoBolt Milestones

2017

GoBolt (previously Second Closet) was founded in 2017

50M+

Items fulfilled and delivered annually

40%

Volume delivered via electric vehicles in 2024

GOBOLT'S SERVICES

Fulfillment

With GoBolt fulfillment centers, it's easy to get started and even easier to scale. We are experts in omnichannel fulfillment, allowing brands to expand with ease across North America.

Last Mile

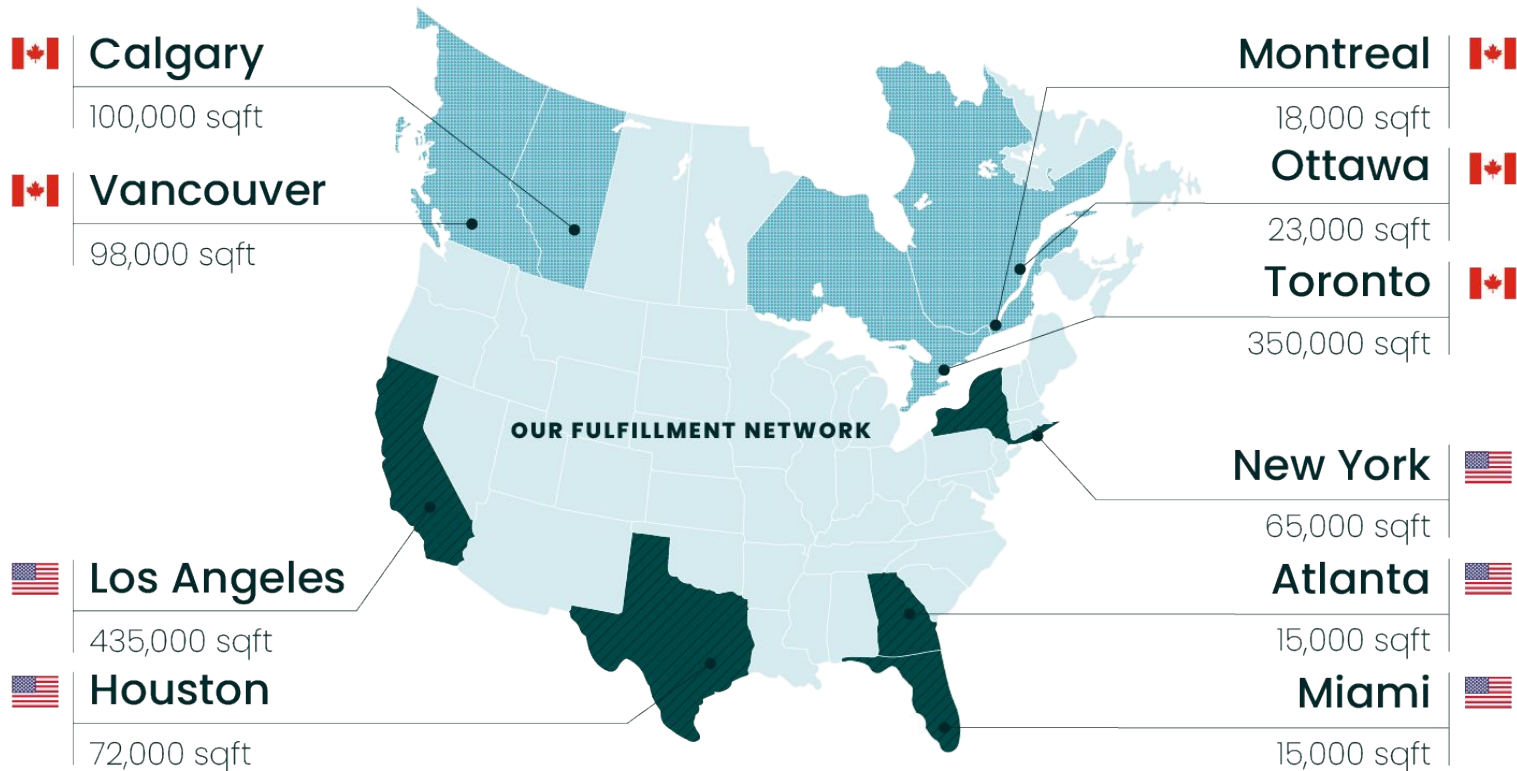

GoBolt's Big & Bulky and Parcel last mile delivery services include; to-the-door, threshold, room of choice, and white glove. Helping brands improve their customer experience, lower costs and reduce emissions – powered by GoBolt's real-time delivery tracking technology.

Returns

With GoBolt's returns technology and processing services, brands can decrease costs, increase revenue, and get more returns back to stock. It ensures that returned items are efficiently processed, tracked, and reintegrated into inventory or disposed of in an environmentally responsible way.

SUSTAINABILITY

Carbon-Neutral Deliveries

We know the future needs to be greener – and recognize that we have a part to play in making that happen. That's why we're building our electric fleet, sequestering our carbon footprint, and optimizing our operations for a circular supply chain to make our deliveries carbon-neutral.

GoBolt's 2024 Sustainability Highlights:

- GoBolt achieved a 562% YoY growth in EV deliveries
- Completed 1.5 million deliveries using an EV
- Nearly 40% of all last mile deliveries are conducted by an EV in 2024
- Avoided 1,090 tons of CO₂ equivalent (tCO₂e)
- Planted 35,028 trees in partnership with veritree
